

Crochet Spider Finger Puppet

You will need

- DK weight yarn
- 2.5mm hook
- 5mm or 6mm safety eyes or needle and thread to embroider
- Black thread and sharp needle for mouth
- nail clippers or wire cutters to trim backs of the eyes
- Scissors
- tiny bit of stuffing
- blunt needle

Tips

Post some florists wire through legs

Instructions

1. Begin with 6sc in adjustable loop (whatever method works best for you - I usually use a double loop out of habit but this isn't essential)
 2. *1sc, 2sc in the next* 3 times (9sc)
 3. 9sc for 4 rounds
 4. 2sc in each sc (18sc)
 5. 18sc for 5 rounds
 6. fix safety eyes into top round with 3 or 4 holes between eyes. Trim and maybe file the post if it's too long.
 7. Push the skinny finger bit up through the middle
 8. Leave your finger in and stuff around it
 9. *2sc together through front loop only, 1sc* 6 times (12sc)
 10. *2sc together through front loop only* 6 times (6sc)
 11. Stuff a little bit more in the top (with your finger in so that the shape isn't lost)
 12. Cut the yarn and pull the last loop out
 13. Thread onto a blunt needle and through the outer loop of remaining 6sc
 14. Pull up carefully to close and secure through the middle several times
- LEGS (make 8)
1. 6sc in adjustable loop
 2. 6sc for 2 rounds
 3. *2sc together through front loop only* 3 times (3sc)
 4. Leave the main loop hanging, push hook through outer loop of the remaining 2sc then pull the main loop through
 5. ch9 (or however long you want the legs) pull the 1st ch really tight to secure the foot
 6. Cut yarn leaving a tail of about 10cm and pull through the last loop to sew to body
 7. Repeat 7 more times

sew 4 legs either side and embroider on a mouth. done :)
